ON THE COVER

Tocopherols (vitamin E) have long been assumed to play essential roles in protecting plants from oxidative stress. Maeda et al. (pages 2710–2732) analyzed a series of *Arabidopsis* vitamin E (*vte*) biosynthetic mutants. Surprisingly, only minor differences were observed between a tocopherol-deficient *vte2* mutant and the wild type during high-intensity light, salinity, and drought stresses. By contrast, *vte* mutants exhibited dramatic phenotypes in response to nonfreezing low temperatures, independently of any photoprotective functions of tocopherols. Further analysis suggested that the mutants were defective in phloem loading capacity. The study indicates that tocopherols play a more limited role in photoprotection than previously assumed but play a crucial role in low-temperature adaptation and phloem loading. The cover shows a false colored image of phloem ultrastructure from cold-treated *vte2* overlaid with a leaf stained with aniline blue for callose visualization. The mutant exhibits dramatic ultrastructural changes exclusively in phloem parenchyma transfer cells, a bottleneck of photo-assimilate export. Cover image by Tammy L. Sage.

IN THIS ISSUE

Homologous Recombination in Higher Plants: Clues from *fasciata1-4*, a New Chromatin Formation Mutant of *Arabidopsis* 2417
Nancy A. Eckardt

IN BRIEF

***Medicago truncatula* CRE1 Cytokinin Receptor Regulates Nodulation and Lateral Root Development** 2419
Pushing the Envelope: The Role of Outer Envelope Proteins PVD1 and PVD2 in Plastid Division
Nancy A. Eckardt

HISTORICAL PERSPECTIVE ESSAY

A Brief History of Systems Biology 2420
Anthony Trewavas

RESEARCH ARTICLES

The Chromatin Assembly Factor Subunit FASCIATA1 Is Involved in Homologous Recombination in Plants 2431
Angela Kirik, Ales Pecinka, Edelgard Wendeler, and Bernd Reiss

Loading of *Arabidopsis* Centromeric Histone CENH3 Occurs Mainly during G2 and Requires the Presence of the Histone Fold Domain 2443
Inna Lermontova, Veit Schubert, Joerg Fuchs, Sabina Klatte, Jiri Macas, and Ingo Schubert

INCREASED LEVEL OF POLYPLOIDY1, a Conserved Repressor of *CYCLINA2* Transcription, Controls Endoreduplication in *Arabidopsis* [W](#) [O](#) [A](#) 2452
Takeshi Yoshizumi, Yuko Tsumoto, Tomoko Takiguchi, Noriko Nagata, Yoshiharu Y. Yamamoto, Mika Kawashima, Takanari Ichikawa, Miki Nakazawa, Naoki Yamamoto, and Minami Matsui

A Rice *Tc1/Mariner*-Like Element Transposes in Yeast 2469
Guojun Yang, Clifford F. Weil, and Susan R. Wessler

The Proteolytic Function of the *Arabidopsis* 26S Proteasome Is Required for Specifying Leaf Adaxial Identity [W](#) [O](#) [A](#) 2479
Weihua Huang, Limin Pi, Wanqi Liang, Ben Xu, Hua Wang, Run Cai, and Hai Huang

***Arabidopsis* FAMA Controls the Final Proliferation/Differentiation Switch during Stomatal Development** [W](#) [O](#) [A](#) 2493
Kyoko Ohashi-Ito and Dominique C. Bergmann

The Plant Cell (ISSN 1040-4651, online ISSN 1531-298X) is published monthly (one volume per year) by the American Society of Plant Biologists, 15501 Monona Drive, Rockville, MD 20855-2768, and is produced by Dartmouth Journal Services, Orford, NH. The institutional price for the print and online versions is based on type of institution; contact institution@aspb.org. A subscription includes both *The Plant Cell* and *Plant Physiology*; single copies may be purchased for \$75 each, plus \$7 shipping (U.S.) or \$9 (outside U.S.). Members of the American Society of Plant Biologists may subscribe to *The Plant Cell* for \$160. Nonmember individuals may subscribe for \$325. For matters regarding subscriptions, contact Suzanne Cholwek, ASPB, 15501 Monona Drive, Rockville, MD 20855-2768; telephone 301/251-0560, ext. 141; fax 301/251-6740; e-mail scholwek@aspb.org. Notify ASPB in writing within 3 months (domestic) or 6 months (foreign) of issue date, and defective copies or copies lost in the mail will be replaced. Send all inquiries regarding display advertising to Kelly Taylor, Leonard Media Group, PO Box 220, 415 Horsham Road, Horsham, PA 19044; telephone 215/675-9133, ext. 226; fax 215/675-9376; e-mail kelly@leonardmedia.com. Periodicals postage paid at Rockville, MD, and at additional mailing offices.

Postmaster: Send address changes to *The Plant Cell*, American Society of Plant Biologists, 15501 Monona Drive, Rockville, MD 20855-2768. The online version of *The Plant Cell* is available at www.plantcell.org.

Permission to Reprint: Permission to make digital or hard copies of part or all of a work published in *The Plant Cell* is granted without fee for personal or classroom use provided that copies are not made or distributed for profit or commercial advantage and that copies bear the full citation and the following notice on the first page: "Copyright American Society of Plant Biologists." For all other kinds of copying, request permission in writing from Nancy A. Winchester, Publications Director, ASPB headquarters.
