ON THE COVER

Plant cells frequently undergo endoreduplication, during which chromosomal DNA is successively duplicated in the absence of mitosis. It has been proposed that endoreduplication is regulated at its entry by mitotic cyclin-dependent kinase activity, but the regulatory mechanisms for its termination remain unclear. On pages 382–396, Imai et al. show that the A-type cyclin CYCA2;3 negatively regulates endocycles and acts as a key regulator of ploidy levels during endoreduplication in Arabidopsis. The authors found that the CYCA2;3 promoter is active in developing trichomes during the termination period of endoreduplication. Loss-of-function mutations of CYCA2;3 semidominantly promoted endocycles and increased the ploidy levels in mature organs but did not significantly affect the proportion of cells that underwent endoreduplication. In addition, expression of a CYCA2;3::GFP fusion protein restrained endocycles in a dose-dependent manner. The cover image shows a 4′,6-diamidino-2-phenylinodole-stained Arabidopsis trichome, which typically has a nuclear DNA content of 32C, in contrast with the 1C DNA content of a haploid genome.
Arabidopsis ACCELERATED CELL DEATH2 Modulates Programmed Cell Death

The Plant Cell (ISSN 1040-4651, online ISSN 1531-298X) is published monthly (one volume per year) by the American Society of Plant Biologists, 15501 Monona Drive, Rockville, MD 20855-2768, and is printed by Dartmouth Journal Services, Box 275, Orford, NH 03777. The institutional price for the print and online versions is $2,160 per year (print and online; online only is $1,860) and includes a subscription to both The Plant Cell and Plant Physiology; single copies may be purchased for $75 each, plus shipping. Members of the American Society of Plant Biologists may subscribe to The Plant Cell for $150. Nonmember individuals may subscribe for $300. For matters regarding subscriptions, contact Suzanne Cholwek, ASPB, 15501 Monona Drive, Rockville, MD 20855-2768; telephone 301/251-0560, ext. 119; fax 301/279-2996; e-mail cholwek@aspb.org. Notify ASPB in writing within 2 months (domestic) or 6 months (foreign) of issue date, and defective copies or copies lost in the mail will be replaced. Send all inquiries regarding display advertising to Kelly Taylor, Leonard Media Group, PO Box 220, 415 Horsham Road, Horsham, PA 19044; telephone 215/675-9133, ext. 226; fax 215/675-9376; e-mail kelly@leinardmedia.com. Periodicals postage paid at Rockville, MD, and at additional mailing offices. Postmaster: Send address changes to The Plant Cell, American Society of Plant Biologists, 15501 Monona Drive, Rockville, MD 20855-2768. The online version of The Plant Cell is available at www.plantcell.org.

Permission to Reprint: Permission to make digital or hard copies or part of or all of a work published in The Plant Cell is granted without fee for personal or classroom use provided that copies are not made or distributed for profit or commercial advantage and that copies bear the full citation and the following notice on the first page: “Copyright American Society of Plant Biologists.” For all other kinds of copying, request permission in writing from Nancy A. Winchester, Publications Director, ASPB headquarters.
