

eTOCs

The *Plant Cell*'s FREE eTOC service allows anyone who registers to be notified via e-mail when new content goes online. You may choose to receive any or all of the following:

- Notification that a new issue of *The Plant Cell* is online
- Planned tables of contents for future issues
- Complete table of contents for new issues
- Special Announcements from ASPB

Download Figures from *The Plant Cell* and *Plant Physiology* as PowerPoint Slides!

The Plant Cell (www.plantcell.org) and *Plant Physiology* (www.plantphysiol.org), ASPB's premier plant science journals, now allow you to save any figure as a PowerPoint slide! This free feature is available for all articles published since 1998.

From the full-text (non-PDF) version of an article, click to "View larger version" of a figure. Then click the button marked "PowerPoint Slide for Teaching." The slide will include the full bibliographic citation of the article in which the figure was published.

We hope that you enjoy this new feature and that it enhances the teaching of plant biology in your classroom.

Biochemistry & Molecular Biology of Plants Online Image Library!

ASPB announces the new Online Image Library – containing all images from the best-selling textbook/reference work *Biochemistry & Molecular Biology of Plants*, by Buchanan, Grissem, and Jones.

The new Online Image Library features images listed by chapter plus the capability to search by individual images. And images are easily imported into PowerPoint for use in presentations.

Access to the site is available for \$49.95. ASPB members receive a **20% DISCOUNT**, making the purchase price for members \$39.95.

To purchase the images from *Biochemistry & Molecular Biology of Plants* using our secure web site, go to <http://www.aspb.org/publications/biotext/imagelibrary/>. Log in as a member for your member discount. Contact info@aspb.org for more information.

Streamline Your Search

12,889,812 articles in over 4,500 MEDLINE journals, including free full-text articles from 797 HighWire-based journals

Searching the leading scientific journals is now easier with the **HighWire Portal**

More Content: includes over 1.8 million articles in more than 4,500 MEDLINE journals.

Better Searching: across the full-text of all 797 HighWire-hosted online journals, plus the entire MEDLINE database, by author, keyword, or citation. Tools for discovery include: concept/topic browsing using HighWire's emerging taxonomy, keyword in context display, "instant index" of clustered search results, citation mapping (showing the most highly-cited articles directly related to an article), and a weighted topic-matching tool.

Easier Access: with nearly 800,000 free full-text articles, HighWire is host to the largest archive of free biomedical research in the world. Free access is also provided from one article to the full-text of cited references in all HighWire-hosted journals. By registering with the portal, users can quickly view which articles in their search results (from over 130 scholarly publishers) are available for free, by current subscription, or through pay-per-view.

More Alerting: sign up to receive Tables of Contents and new content alerts matching keywords, authors, citations, and topics in any of the HighWire-hosted titles plus all of MEDLINE.

Find just what you need at www.highwire.org

ASPB Open Access Option

The Open Access movement in scholarly publishing advocates that research content should be freely available to all immediately upon publication. This approach has prompted publishers to examine the feasibility of a shift from traditional subscription-based (“user pays”) financial models to an “author-pays” model, in which some or all of the costs of publication are typically borne by authors.

What does our author community think about Open Access? To gauge the plant science community’s interest in this new approach to publishing and to help ASPB determine the viability of “author-pays” publishing models, the Society is conducting an 18-month Open Access “experiment.” Beginning with the December 2005 issues of *The Plant Cell* and *Plant Physiology*, authors of articles accepted by the journals will be given the option to pay a surcharge to make their online article free from the moment of publication to anyone with Internet access. The surcharge, which is in addition to the usual author charges, will be \$1,000 (discounted to \$500 if the author’s institution subscribes to the journal).

For more information, go to <http://www.aspb.org/publications/openaccess.cfm> or contact Nancy Winchester, ASPB director of publications, at nancyw@aspb.org.

Cite Track Alerts

Cite Track Alerts is a free service providing email-based alerts when new articles matching your search criteria are published in *The Plant Cell* Online, or when designated *Plant Cell* Online articles are cited by new articles from a designated set of journals (<http://www.plantcell.org/help/ijlinks.dtl>).
