Volume 18 Number 5 May 2006

The electronic form of this issue, available on or before May 1, 2006, at www.plantcell.org, is considered the journal of record.

ON THE COVER

MicroRNAs (miRNAs) are endogenous 21- to 24-nucleotide molecules processed from a longer precursor fold-back termed pre-miRNA. mRNAs that are completely or partially complementary to the miRNA are targeted for cleavage, leading to their destruction. Alvarez et al. (pages 1134–1151) and Schwab et al. (pages 1121–1133) show that the miRNA sequences of natural precursors can be altered to produce designer molecules targeting specific mRNAs. The cover illustrates the floral phenotype from the overexpression of two different pre-miRNAs (shown in the background) with novel, designed miRNAs (highlighted in red). To the left, a *Nicotiana tabacum* plant expressing a pre-miRNA designed to target several *AUXIN RESPONSE FACTOR* genes is shown. These genes promote abaxial identity in lateral organs, and their silencing led to an ectopic ring of corolla lobes arising abaxially from the floral tube. To the right, an inflorescence of an *Arabidopsis* plant in which several MADS box genes are targeted is shown. These genes control various aspects of organ and meristem identity, and their silencing produces a novel phenotype not seen in single mutants.

EDITORIAL

Plant Genomes 1099
Rich Jorgensen

COMMENTARY

Comparative Sequencing of Plant Genomes: Choices to Make 1100
Scott Jackson, Steve Rounsley, and Michael Purugganan

IN THIS ISSUE

A Wheel within a Wheel: Temperature Compensation of the Circadian Clock 1105
Nancy A. Eckardt

IN BRIEF

Sugar Signaling between Plastids and the Plasma Membrane 1109

Ancient Polyploidy in the Sister Families Brassicaceae and Cleomaceae
Nancy A. Eckardt

HISTORICAL PERSPECTIVE ESSAY

Phototropism: Bending towards Enlightenment 1110
Craig W. Whippo and Roger P. Hangarter

RESEARCH ARTICLES

Highly Specific Gene Silencing by Artificial MicroRNAs in *Arabidopsis*   1121
Rebecca Schwab, Stephan Ossowski, Markus Riester, Norman Warthmann, and Detlef Weigel

Endogenous and Synthetic MicroRNAs Stimulate Simultaneous, Efficient, and Localized Regulation of Multiple Targets in Diverse Species  1134
John Paul Alvarez, Irena Pekker, Alexander Goldshmidt, Eyal Blum, Ziva Amsellem, and Yuval Eshed

Independent Ancient Polyploidy Events in the Sister Families Brassicaceae and Cleomaceae  1152
M. Eric Schranz and Thomas Mitchell-Olds

Locus-Specific Control of DNA Methylation by the *Arabidopsis* SUVH5 Histone Methyltransferase  1166
Michelle L. Ebbs and Judith Bender

The Plant Cell (ISSN 1040-4651, online ISSN 1531-298X) is published monthly (one volume per year) by the American Society of Plant Biologists, 15501 Monona Drive, Rockville, MD 20855-2768, and is produced by Dartmouth Journal Services, Orford, NH. The institutional price for the print and online versions is based on type of institution; contact institution@aspb.org. A subscription includes both *The Plant Cell* and *Plant Physiology*; single copies may be purchased for \$75 each, plus \$7 shipping (U.S.) or \$9 (outside U.S.). Members of the American Society of Plant Biologists may subscribe to *The Plant Cell* for \$160. Nonmember individuals may subscribe for \$325. For matters regarding subscriptions, contact Suzanne Cholwek, ASPB, 15501 Monona Drive, Rockville, MD 20855-2768; telephone 301/251-0560, ext. 141; fax 301/251-6740; e-mail scholwek@aspb.org. Notify ASPB in writing within 3 months (domestic) or 6 months (foreign) of issue date, and defective copies or copies lost in the mail will be replaced. Send all inquiries regarding display advertising to Kelly Taylor, Leonard Media Group, PO Box 220, 415 Horsham Road, Horsham, PA 19044; telephone 215/675-9133, ext. 226; fax 215/675-9376; e-mail kelly@leonardmedia.com. Periodicals postage paid at Rockville, MD, and at additional mailing offices. **Postmaster:** Send address changes to *The Plant Cell*, American Society of Plant Biologists, 15501 Monona Drive, Rockville, MD 20855-2768. The online version of *The Plant Cell* is available at www.plantcell.org.

Permission to Reprint: Permission to make digital or hard copies of part or all of a work published in *The Plant Cell* is granted without fee for personal or classroom use provided that copies are not made or distributed for profit or commercial advantage and that copies bear the full citation and the following notice on the first page: "Copyright American Society of Plant Biologists." For all other kinds of copying, request permission in writing from Nancy A. Winchester, Publications Director, ASPB headquarters.
