**PLANT**  
C E L L

Volume 19 Number 3 March 2007

The electronic form of this issue, available at [www.plantcell.org](http://www.plantcell.org), is the journal of record.

**ON THE COVER**

Selection by pollinators is an important factor in floral evolution and plant speciation. Hoballah et al. (pages 779–790) investigated genetic changes associated with the evolution of divergent pollination syndromes in two species of *Petunia*. The authors analyzed *ANTHOCYANIN2*, which encodes a *myb*-type transcription factor that is a major determinant of flower color variation in *Petunia*. Loss-of-function alleles of *AN2*, resulting in white or pale flower color, arose at least five times independently among wild *P. axillaris* accessions, whereas *P. integrifolia* contains a functional *AN2* gene that is associated with the production of magenta flowers. Functional assays for pollinator preference showed that hawk moths have a strong preference for *P. axillaris* flowers, whereas bumblebees prefer the highly colored *P. integrifolia* flowers. Transformation of *P. axillaris* with a functional *P. integrifolia*-type *AN2* cDNA restored *AN2* function and resulted in a switch of pollinator preference to match that of *P. integrifolia*. Thus, adaptation of plant species to a new pollinator can involve a limited number of genes of large effect. The cover image shows an adult hawk moth (*Manduca sexta*) feeding on *P. axillaris*.

**IN THIS ISSUE**

**Light Regulation of Plant Development: HY5 Genomic Binding Sites** 727  
Nancy A. Eckardt

**IN BRIEF**

**Novel Oxylipin Signaling Cascades** 730  
**Focus on Meiotic Crossover Interference**  
Nancy A. Eckardt

**RESEARCH ARTICLES**

**Analysis of Transcription Factor HY5 Genomic Binding Sites Revealed Its Hierarchical Role in Light Regulation of Development** [W](#) 731

Jungeun Lee, Kun He, Viktor Stolc, Horim Lee, Pablo Figueroa, Ying Gao, Waraporn Tongprasit, Hongyu Zhao, Ilha Lee, and Xing Wang Deng

**Elaboration of B Gene Function to Include the Identity of Novel Floral Organs in the Lower Eudicot *Aquilegia*** [W](#) 750

Elena M. Kramer, Lynn Holappa, Billie Gould, M. Alejandra Jaramillo, Dimitriy Setnikov, and Philip M. Santiago

**TERMINAL FLOWER1 Is a Mobile Signal Controlling *Arabidopsis* Architecture** [W](#) 767  
Lucio Conti and Desmond Bradley

**Single Gene-Mediated Shift in Pollinator Attraction in *Petunia*** [W](#) 779

Maria Elena Hoballah, Thomas Gubitz, Jeroen Stuurman, Larissa Broger, Mario Barone, Therese Mandel, Alexandre Dell’Olivo, Maeva Arnold, and Cris Kuhlemeier

**Seed Germination of GA-Insensitive *sleepy1* Mutants Does Not Require RGL2 Protein Disappearance in *Arabidopsis*** [W](#) 791

Tohru Ariizumi and Camille M. Steber

**The Mitogen-Activated Protein Kinase Cascade MKK3–MPK6 Is an Important Part of the Jasmonate Signal Transduction Pathway in *Arabidopsis*** [W](#) [OA](#) 805

Fuminori Takahashi, Riichiro Yoshida, Kazuya Ichimura, Tsuyoshi Mizoguchi, Shigemi Seo, Masahiro Yonezawa, Kyonoshin Maruyama, Kazuko Yamaguchi-Shinozaki, and Kazuo Shinozaki

**The Antagonist Function of *Arabidopsis* WRKY53 and ESR/ESP in Leaf Senescence Is Modulated by the Jasmonic and Salicylic Acid Equilibrium** 819

Ying Miao and Ulrike Zentgraf

**Oxylipins Produced by the 9-Lipoxygenase Pathway in *Arabidopsis* Regulate Lateral Root Development and Defense Responses through a Specific Signaling Cascade** [W](#) 831

Tamara Vellosillo, Marta Martinez, Miguel Angel Lpez, Jorge Vicente, Tomas Cascn, Liam Dolan, Mats Hamberg, and Carmen Castresana
