Remarkably simple system.
Simply remarkable results.

The new StepOne™ System makes it easy to get high-quality real-time PCR results.

The StepOne System combines plug-and-play convenience with the uncompromising performance that has made Applied Biosystems the leader in real-time PCR. Whether you’re a first-time user or a real-time PCR expert, the StepOne system delivers the highest quality results using the full range of TaqMan® Gene Expression and SNP Genotyping assays. The system’s software guides new users through set up, operation and analysis, while also providing power and flexibility to meet the expectations of even the most experienced users. The StepOne Real-Time PCR System is part of an optimized system solution for real-time PCR that includes software, reagents, and instrumentation—all for a remarkably low price.
