ON THE COVER

Embryogenesis begins after ovule fertilization when the zygote undergoes cell division to establish the apical and basal embryo and then continues with specialized cell divisions until a mature embryo is formed. Inhibitor and genetic studies have shown that auxin gradients contribute to both ovule and embryo development. The *Arabidopsis thaliana* protein APM1 is an M1 metalloprotease that has affinity for and catalyzes the hydrolysis of the auxin transport inhibitor naphthylphthalamic acid. Peer et al. (pages 1693–1721) show that, in addition to embryonic patterning defects, *apm1* loss-of-function alleles exhibit distinct seedling lethal phenotypes caused by premature determinacy of the primary root meristem. The cover image shows four ovules in a silique from an *apm1-1* heterozygous plant as well as a pollen tube in the top right corner. The two synergid cells, an egg cell, and two polar nuclei are visible in the center left ovule.

IN BRIEF

- A High-Resolution Map of Auxin Distribution in the *Arabidopsis* Root Apex** 1621
Nancy A. Eckardt
- A Plastidic Transporter Involved in Aliphatic Glucosinolate Biosynthesis** 1622
Kathleen L. Farquharson
- The Tomato Pto Kinase Uses Shared and Unique Surfaces to Recognize Divergent Avirulence Proteins** 1623
Nancy R. Hofmann
- Investigating Translational Repression by MicroRNAs in *Arabidopsis*** 1624
Nancy A. Eckardt

PERSPECTIVES

- Exploring the Function-Location Nexus: Using Multiple Lines of Evidence in Defining the Subcellular Location of Plant Proteins** 1625
A. Harvey Millar, Chris Carrie, Barry Pogson, and James Whelan
- Validating the Location of Fluorescent Protein Fusions in the Endomembrane System** 1632
Ian Moore and Angus Murphy

REVIEW

- Advancing Genetic Theory and Application by Metabolic Quantitative Trait Loci Analysis** 1637
Daniel J. Kliebenstein

RESEARCH ARTICLES

- The Maize Transcription Factor KNOTTED1 Directly Regulates the Gibberellin Catabolism Gene *ga2ox1*** [W](#) [O](#) [A](#) 1647
Nathalie Bolduc and Sarah Hake
- An Auxin Gradient and Maximum in the *Arabidopsis* Root Apex Shown by High-Resolution Cell-Specific Analysis of IAA Distribution and Synthesis** [W](#) 1659
Sara V. Petersson, Annika I. Johansson, Mariusz Kowalczyk, Alexander Makoveychuk, Jean Y. Wang, Thomas Moritz, Markus Grebe, Philip N. Benfey, Göran Sandberg, and Karin Ljung

Printed in the United States of America.

The Plant Cell (ISSN 1040-4651, online ISSN 1531-298X) is published monthly (one volume per year) by the American Society of Plant Biologists, 15501 Monona Drive, Rockville, MD 20855-2768, and is produced by Dartmouth Journal Services, Waterbury, VT. The institutional price for the print and online versions is based on type of institution; contact institution@aspb.org. A subscription includes both *The Plant Cell* and *Plant Physiology*; single copies may be purchased for \$95 each, plus \$10 shipping (U.S.) or \$12 (outside U.S.). Members of the American Society of Plant Biologists may subscribe to *The Plant Cell* for \$185. Nonmember individuals may subscribe for \$375. For matters regarding subscriptions, contact Suzanne Cholwek, ASPB, 15501 Monona Drive, Rockville, MD 20855-2768; telephone 301/296-0926; fax 301/251-6740; e-mail scholwek@aspb.org. Notify ASPB in writing within 3 months (domestic) or 6 months (foreign) of issue date, and defective copies or copies lost in the mail will be replaced. Send all inquiries regarding display advertising to FASEB AdNet, 9650 Rockville Pike, Bethesda, MD 20814-3998; telephone 301/634-7791; fax 301/634-7153; e-mail adnet@faseb.org. Periodicals postage paid at Rockville, MD 20850, and at additional mailing offices.

Postmaster: Send address changes to *The Plant Cell*, American Society of Plant Biologists, 15501 Monona Drive, Rockville, MD 20855-2768. The online version of *The Plant Cell* is available at www.plantcell.org.

Permission to Reprint: Permission to make digital or hard copies of part or all of a work published in *The Plant Cell* is granted without fee for personal or classroom use provided that copies are not made or distributed for profit or commercial advantage and that copies bear the full citation and the following notice on the first page: "Copyright American Society of Plant Biologists." For all other kinds of copying, request permission in writing from Nancy A. Winchester, Publications Director, ASPB headquarters.
