The Jagiellonian University in Krakow and the Max Planck Society announce a Max Planck Research Group in the area of Molecular Plant Sciences (including plant-microbe interactions). The group will be located at the Jagiellonian University in Krakow.

The successful candidate should be early in her/his scientific career. The candidate is expected to develop an internationally competitive research program. Ideally, the scientific activities would complement ongoing research at the University and at the host institute of the Max Planck Society.

Funding covers a start-up equipment package (500,000 Polish Zlotys which is an equivalent to approx. 150,000 Euro) and necessary and adequate running costs. In addition, funding is provided for the position of the group leader at the level of an associate professor (employed at a Max Planck Institute to be determined and detached to the Jagiellonian University in Krakow) and further staff members (one post-doctoral fellow post or two graduate students, one Ph.D. student and one technician) to be employed at the Jagiellonian University in Krakow. The initial appointment of the group leader is for 5 years with the possibility of extension (2 x 2 years) after international review.

Applications should include a CV, a list of publications, a one-page summary of scientific achievements, a two-page research plan and two letters of recommendation.

Deadline for application is December 16, 2010. Successful applicants should be prepared to join a selection symposium held on January 26+27, 2011 in Krakow, Poland.

For further information and detailed application instructions see [http://www.mprg.mpg.de](http://www.mprg.mpg.de)

The Max Planck Society is an equal opportunity employer, and is interested to raise the proportion of women in areas where they are underrepresented. Thus applications from female scientists are especially encouraged.

FACILITY POSITION AT YALE UNIVERSITY
Department of Molecular, Cellular and Developmental Biology

The Department of Molecular, Cellular and Developmental Biology at Yale University invites applications for a faculty appointment as an associate, assistant or full professor from individuals working on any area of plant biology. The Department encourages applications from candidates using any experimental approach, including molecular, genetic, biochemical, or genetic/proteomic approaches, to investigate outstanding questions in modern plant biology at the organismal, cellular or molecular level. We expect the successful candidate to develop an active research group, be an interactive member of the faculty and participate in interdisciplinary research and training. The successful candidate should demonstrate communication skills commensurate with excellence in teaching at both the undergraduate and graduate levels.

Applications will close Dec. 10, 2010. Submit an application, a curriculum vitae and a description of research interests on line to https://academicjobsonline.org/ajo/Yale. Please request at least three individuals submit letters of recommendation on your behalf to https://academicjobsonline.org/ajo/Yale. For questions, please e-mail medb.plantsearch@yale.edu.

Yale University is an Affirmative Action/Equal Opportunity Employer. Women and members of underrepresented minority groups are especially encouraged to apply.

Advertise in The Plant Cell

Reach top plant biologists by advertising in The Plant Cell. Product and job recruitment ads are accepted. Space is also available in Plant Physiology and the ASPB News. Discounts are available for multiple ad placements.

IT IS ROCKET SCIENCE

BOOST YOUR RESEARCH WITH HYBRIGENICS SERVICES

Save time and money with our 3 lines of services to:

DISCOVER novel protein interactions,
VALIDATE protein functions in cells,
INHIBIT protein interactions with small molecules.

Over 100 publications in top-ranking journals.
Benefit from 15 years of expertise in protein interactions.
