Volume 24 Number 12 December 2012

The electronic form of this issue, available at www.plantcell.org, is the journal of record.

ON THE COVER

Transition from meiotic to mitotic divisions directly leads to the onset of embryogenesis in animals. By contrast, plant meiospores first develop into the haploid generation of the gametophyte, requiring additional mitotic divisions. On pages 4974–4991, Juranić et al. report that a protein homologous to a key animal protein regulating meiosis–mitosis transition is required to organize the second meiotic and first mitotic spindle apparatus in maize. Silencing of the germ line–specific MATH-BTB domain gene MAB1 causes defects in spindle organization together with chromosome loss during meiotic divisions and failure to establish germ cell fate during the first asymmetric mitotic divisions in both germ lines. The cover image shows a tetrad of maize microspores with fluorescently labeled microtubules and DAPI-stained nuclei.

IN BRIEF

A Tripartite Growth Regulatory Cascade of Basic Helix-Loop-Helix Transcription Factors 4775
Nancy R. Hofmann

Crosstown Trafficking: The Retromer Complex Component VPS29 and Recycling of the Vacuolar Sorting Receptor 4776
Jennifer Mach

REVIEW

The Promiscuous Life of Plant NUCLEAR FACTOR Y Transcription Factors 4777
Katia Petroni, Roderick W. Kumimoto, Nerina Gnesutta, Valentina Calvenzani, Monica Fornari, Chiara Tonelli, Ben F. Holt, III and Roberto Mantovani

LARGE-SCALE BIOLOGY ARTICLE

GWAPP: A Web Application for Genome-Wide Association Mapping in *Arabidopsis* 4793
Ümit Seren, Bjarni J. Vilhjálmsson, Matthew W. Horton, Dazhe Meng, Petar Forai, Yu S. Huang, Quan Long, Vincent Segura, and Magnus Nordborg

RESEARCH ARTICLES

***Ln* Is a Key Regulator of Leaflet Shape and Number of Seeds per Pod in Soybean** 4807
