Volume 25 Number 2 February 2013

The electronic form of this issue, available at www.plantcell.org, is the journal of record.

ON THE COVER

The products of B class floral homeotic genes specify petal and stamen identity. Lange et al. (pages 438–453) describe the molecular characterization of *seirena-1*, a mutant from the basal eudicot California poppy (*Eschscholzia californica*) that shows homeotic changes characteristic of floral homeotic B class mutants. *SEIRENA* is found to be a B function gene of the PI/GLO clade, and the *sei* mutant protein lacks a conserved PI domain present in most PI/GLO proteins. The results suggest that the PI domain is required for specific multimeric associations of MADS proteins necessary to confer stamen identity, and possibly petal identity, in most flowering plants. The cover shows mature flowers of wild type (top), a plant treated with *SEI* Virus-Induced gene Silencing (bottom left), and a *sei* mutant poppy (bottom right) (photos by Matthias Lange, cover design by Annette Becker).

IN BRIEF

- Gene Expression in Angiosperm Organ Evolution** 357
Nancy R. Hofmann
- Phosphorylation and Dark Reversion of Phytochrome B** 358
Nancy R. Hofmann
- COP9 Signalosome-Regulated Proteolysis: Turning Off Ascorbic Acid Synthesis When the Lights Go Out** 359
Jennifer Mach

LETTERS TO THE EDITOR

- Assigning Gene Function in Biosynthetic Pathways: Camalexin and Beyond** 360
Morten Emil Møldrup, Fernando Geu-Flores, and Barbara Ann Halkier
- Reply: Complexity in Camalexin Biosynthesis** 367
Tongbing Su, Yuan Li, Hailian Yang, and Dongtao Ren

RESEARCH ARTICLES

- A Large-Scale Identification of Direct Targets of the Tomato MADS Box Transcription Factor RIPENING INHIBITOR Reveals the Regulation of Fruit Ripening** 371
Masaki Fujisawa, Toshitsugu Nakano, Yoko Shima, and Yasuhiro Ito
- GLUCAN SYNTHASE-LIKE8 and STEROL METHYLTRANSFERASE2 Are Required for Ploidy Consistency of the Sexual Reproduction System in *Arabidopsis*** 387
Nico De Storme, Joachim De Schrijver, Wim Van Criekinge, Vera Wewer, Peter Dörmann, and Danny Geelen
- The WD40-Repeat Proteins NFC101 and NFC102 Regulate Different Aspects of Maize Development through Chromatin Modification** 404
Iride Mascheretti, Raffaella Battaglia, Davide Mainieri, Andrea Altana, Massimiliano Lauria, and Vincenzo Rossi
- The TIE1 Transcriptional Repressor Links TCP Transcription Factors with TOPLESS/TOPLESS-RELATED Corepressors and Modulates Leaf Development in *Arabidopsis*** 421
Qing Tao, Dongshu Guo, Baoye Wei, Fan Zhang, Changxu Pang, Hao Jiang, Jinzhe Zhang, Tong Wei, Hongya Gu, Li-Jia Qu, and Genji Qin

The Plant Cell (ISSN 1040-4651, online ISSN 1532-298X) is published monthly (one volume per year) by the American Society of Plant Biologists, 15501 Monona Drive, Rockville, MD 20855-2768, and is produced by Dartmouth Journal Services, Waterbury, VT. The institutional price for the print and online versions is based on type of institution; contact institution@aspb.org. A subscription includes both *The Plant Cell* and *Plant Physiology*; single copies may be purchased for \$95 each, plus \$10 shipping (U.S.) or \$12 (outside U.S.). Members of the American Society of Plant Biologists may subscribe to *The Plant Cell* for \$185. Nonmember individuals may subscribe for \$375. For matters regarding subscriptions, contact Suzanne Cholwek, ASPB, 15501 Monona Drive, Rockville, MD 20855-2768; telephone 301/296-0926; fax 301/251-6740; e-mail scholwek@aspb.org. Notify ASPB in writing within 3 months (domestic) or 6 months (foreign) of issue date, and defective copies or copies lost in the mail will be replaced. Send all inquiries regarding display advertising to FASEB AdNet, 9650 Rockville Pike, Bethesda, MD 20814-3998; telephone 301/634-7791; fax 301/634-7153; e-mail adnet@faseb.org. Periodicals postage paid at Rockville, MD 20850, and at additional mailing offices.

Postmaster: Send address changes to *The Plant Cell*, American Society of Plant Biologists, 15501 Monona Drive, Rockville, MD 20855-2768. The online version of *The Plant Cell* is available at www.plantcell.org.

Permission to Reprint: Permission to make digital or hard copies of part or all of a work published in *The Plant Cell* is granted without fee for personal or classroom use provided that copies are not made or distributed for profit or commercial advantage and that copies bear the full citation and the following notice on the first page: "Copyright American Society of Plant Biologists." For all other kinds of copying, request permission in writing from Nancy A. Winchester, Publications Director, ASPB headquarters.
