ON THE COVER

Land plants synthesize a family of flavonoid metabolites that provide pigmentation in flowers, fruits, and seeds to attract pollinators and seed dispersers. The cover image illustrates the accumulation of anthocyanin, the major flavonoid pigment, in the blooming flowers and developing silicles of *Arabidopsis* species. Zhang et al. (pages 1157–1174) discovered a crucial proteolytic regulator, a Kelch domain-containing F-box (KFB) protein, in the model plant *Arabidopsis*, which specifically interacts with chalcone synthase in the flavonoid biosynthetic pathway and mediates its stability in response to the development cues and environmental stimuli, thereby coordinately controlling flavonoid production. This work deepens our mechanistic understanding of the molecular regulation of flavonoid pigment synthesis and provides us with a molecular tool for engineering flavonoid accumulation in plants. Photo by Roger Stoutenburgh.

IN BRIEF

- Chasing Scattered Genes: Identifying Specialized Metabolite Pathway Genes through Global Coexpression Analysis** [OPEN](#) 915
Jennifer Lockhart
- The Long-Noncoding RNA ELENA1 Functions in Plant Immunity** [OPEN](#) 916
Jennifer Mach
- Division of Labor during Apical Hook Formation** [OPEN](#) 917
Kathleen L. Farquharson

LARGE-SCALE BIOLOGY ARTICLES

- Exploiting the Genetic Diversity of Maize Using a Combined Metabolomic, Enzyme Activity Profiling, and Metabolic Modeling Approach to Link Leaf Physiology to Kernel Yield** 919
Rafael A. Cañas, Zhazira Yesbergenova-Cuny, Margaret Simons, Fabien Chardon, Patrick Armengaud, Isabelle Quilleré, Caroline Cukier, Yves Gibon, Anis M. Limami, Stéphane Nicolas, Lenaïg Brulé, Peter J. Lea, Costas D. Maranas, and Bertrand Hirel
- A Global Coexpression Network Approach for Connecting Genes to Specialized Metabolic Pathways in Plants** 944
Jennifer H. Wisecaver, Alexander T. Borowsky, Vered Tzin, Georg Jander, Daniel J. Kliebenstein, and Antonis Rokas
- Multi-Omics of Tomato Glandular Trichomes Reveals Distinct Features of Central Carbon Metabolism Supporting High Productivity of Specialized Metabolites** [OPEN](#) 960
