ON THE COVER

Nectaries play a major economic and ecological role in mediating insect pollination, but the genetics underlying nectary development and its diversity remain poorly understood. Morel et al. (pages 2020–2037) analyzed nectary development in petunia and *Arabidopsis*, which have their nectaries associated with the ovary and stamens, respectively. They found that the floral C-lineage genes trigger nectary development in both species, despite their distant phylogeny, different nectary positioning, and different evolutionary trajectories of their C-lineage genes. However, petunia nectary development is position-independent within the flower, unlike in *Arabidopsis*. Furthermore, the authors identified *BEN* and *ROB* genes as major regulators of nectary size in petunia. The cover image shows ectopic nectaries at the basis of the sepals in *35S:pMADS3* flowers, actively secreting big droplets of nectar. Photo by Michiel Vandenbussche.

IN BRIEF

- Handling the Heat: Methylome Variation Underlying Heat Tolerance in Cotton**^[OPEN] 1947
Alex Harkess
- Nectary Specification in Petunia and *Arabidopsis***^[OPEN] 1949
Jennifer Mach
- Natural Artist: How a Protein Kinase Helps Sculpt the Pollen Grain Surface from the Inside Out**^[OPEN] 1950
Jennifer Lockhart
- A Lipid Droplet-Associated Degradation System in Plants**^[OPEN] 1952
Kathleen L. Farquharson

RESEARCH ARTICLES

- APURINIC/APYRIMIDINIC ENDONUCLEASE2 and ZINC FINGER DNA 3'-PHOSPHOESTERASE Play Overlapping Roles in the Maintenance of Epigenome and Genome Stability**^[OPEN] 1954
Jinchao Li, Wenjie Liang, Yan Li, and Weiqiang Qian
- Integrated Regulation of Apical Hook Development by Transcriptional Coupling of EIN3/EIL1 and PIFs in *Arabidopsis*** 1971
Xing Zhang, Yusi Ji, Chang Xue, Honghao Ma, Yulin Xi, Peixin Huang, Huan Wang, Fengying An, Bosheng Li, Yichuan Wang, and Hongwei Guo
- Photoexcited CRYPTOCHROME1 Interacts with Dephosphorylated BES1 to Regulate Brassinosteroid Signaling and Photomorphogenesis in *Arabidopsis*** 1989
Wenxiu Wang, Xuedan Lu, Ling Li, Hongli Lian, Zhilei Mao, Pengbo Xu, Tongtong Guo, Feng Xu, Shasha Du, Xiaoli Cao, Sheng Wang, Hongyun Shen, and Hong-Quan Yang
- B-BOX DOMAIN PROTEIN28 Negatively Regulates Photomorphogenesis by Repressing the Activity of Transcription Factor HY5 and Undergoes COP1-Mediated Degradation** 2006
Fang Lin, Yan Jiang, Jian Li, Tingting Yan, Liumin Fan, Jiansheng Liang, Z. Jeffrey Chen, Dongqing Xu, and Xing Wang Deng
