

## EDITORIAL

### Thank You, Editors and Reviewers of *The Plant Cell*

We would like to thank members of the editorial board and all of our reviewers, on whom we rely to maintain and enhance the quality of scholarship published within our pages.

In the past 4 years, we have instituted various changes in the editorial and peer review process, including a renewed focus on rapid turnaround to final decision, pre-review consultations between multiple editors to determine suitability for external review, and post-review consultations between editors and reviewers to help guide the decision. The aim is to provide authors with clear decisions as quickly as possible, yet based on careful consideration through true peer review.

Based on feedback from our authors who appreciate the extra effort that has gone into the decision-making process, this endeavor has been successful, often even when a manuscript has been declined (either because the decision was made quickly and/or the decision letter reflected a fair and thorough assessment of the work). This process requires commitment and considerable investment of time from editors and reviewers alike, and we are deeply appreciative of all those who have volunteered their time in the service of *The Plant Cell*.

We offer special thanks to the following editors who are leaving the editorial board this year: Judy Callis, Giles Oldroyd, Markus Pauly, and Keiko Sugimoto, who served the journal as reviewing editors for a number years; and to Francis-Andre Wollman, who served as a consulting editor for 2 years after the untimely death of Fabrice Rappaport. In addition, we thank assistant features editors Margaret Frank, Jenna Gallegos, Alizée Malnoë, and Brook Moyers, who left the board in 2018. A special thanks also to Jean Greenberg, who served as senior editor, and to Ute Kramer and Dale Sanders, who served as

reviewing editors for a number of years, all of whom stepped down to a guest editor role in 2018.

During the past 4 years, the editorial board has been expanded to almost 3 times its former size to ensure that the breadth of plant biology is represented. At present count, we have 10 senior editors, 29 reviewing editors, 43 guest editors, 9 consulting editors, and 27 features editors representing more than 70 institutions in 15 countries. Profiles of our editors can be found at <https://plantcelleditor.weebly.com/>. Please recommend several editors who can appreciate your work when you submit your next manuscript to *The Plant Cell*.

Last but not least, we offer a sincere thank you to the many external reviewers, on behalf of all our authors, editors, and readers, for your willingness to provide thoughtful and constructive reviews. Reviewers who served the journal between January 1 and December 20, 2018, are listed below.

**Nancy A. Eckardt**
