Supplementary Figure 1. 5-d seedlings.

(A) PIN4 immunolocalization in tt4.
(B) DIC image of (A).
(C) Overlay of (A) and (B).
(D) PIN1 immunolocalization in WT hypocotyls.
(E) PIN1 immunocalization in tt4 hypocotyls.
(F) PIN1 immunocalization in WT root transition zone.
(G) PIN1 immunocalization in tt4 root transition zone.
(H) PIN1 immunocalization in tt7 root transition zone.
(I) PIN1 immunocalization in tt3 root transition zone.
(J) Epifluorescence image of DPBA-flavonoid fluorescence in WT root tip.
(K) DIC image of (J).
(L) Overlay of (J) and (K).
(M) Overlay of (J) and (K) with increased opacity of DIC image (K) and arrows pointing to cell layers.
(N) Epifluorescence image of PIN1 in WT roots after IAA application to shoot apex.
(O) Epifluorescence image of PIN1 in WT roots after IAA application to root apex.
